I'm a self-taught front end software developer with experience of three years, I enjoy creating great UI/UX projects.

I help teams of JR developers to create their projects and one of the teams I helped got the first place at the W3School contest.

I also worked as an archeologist in Egypt and now I'm enjoying the front end development and drawing portraits, really Drawing helped me a lot developing my designing skills.

Work Experience

Customer Service Representative • Sutherland Global Services

November 2015 - January 2018

Worked as a Sutherland consultant while I was in Egypt, we were among the best teams in the world, achieving the best high quality and scores, we worked as a third party company for the oil company called Shlumberger.

My job was to monitor the transportation of the oil in Egypt, Sudan, Iraq, Algeria and Tunisia and to ensure the safety of the truck drivers, giving them the necessary authorizations and then live tracking them at every check point.
